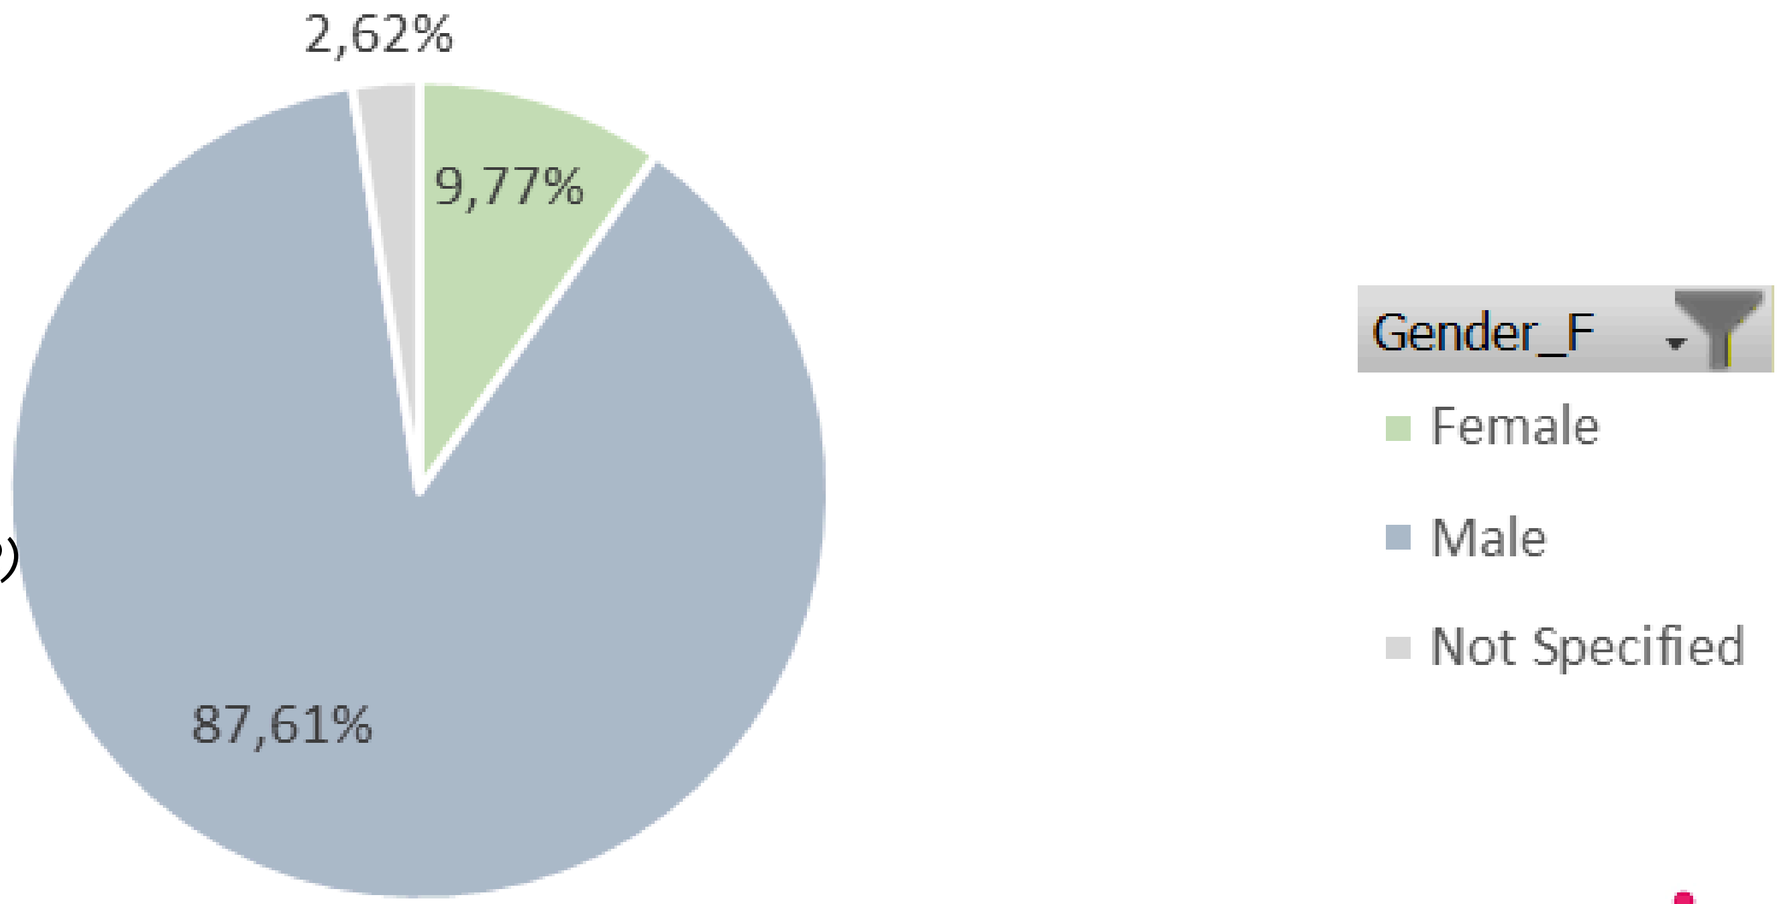
- Moderate
- Outstanding

Viewership by Gender

Male: 88% **(8761)**

Female: 10% (***977***)

Not Specified: 2% (***262***)



Key Insights

- Evening hours (17:00–22:00) dominate viewing, contributing the highest share of total consumption, including the Afternoon (12H00 - 17h00) slightly below.
- Male users show slightly higher total watch time (sports, news, action content).
- Gauteng leads in total consumption (urban, high connectivity).
- Western Cape & KwaZulu-Natal follow with strong engagement levels.
- Short sessions (0–30 mins) " casual viewers"
- Medium sessions (30–90 mins) "regular users"
- Most viewes are Black and also Male
- Adults (30 - 49) are the average age of viewer

Conclusion

- Expanding into low performing time slots
- Add more shows/Channels that cater for female
- Exapand channels that are for Teenagers, more in the afternoon time slots
- Add more interesting and engaging in the evening
